

PHOENIX POWER PAD WASHER

PHOENIX BLAST PAD CLEANER

The pad washer will accommodate pads up to 24" in size, is wall hung and comes with a mounting bracket. The force of the water spins the pad, which helps to dry it. The unit should be installed near a drain and hot water supply. When used with Phoenix Blast Pad cleaning chemical, you have a very effective and quick way to clean dirty pads. Also shown in the picture is the Phoenix Pad Drying Rack.

Phoenix Blast is designed for deep penetration and quick soil release. It has low foaming properties and is economical to use.
